main products*

The Automated Document Applicator (ADA) automatically prints, folds and applies a set of documents to the outside of a carton in a 'documents enclosed' pouch. The machine is easily implementable, because it is "stand-alone" deployable.

Company description*

Inther is an international system integrator. We are a 'one stop shop' for all logistic issues. Inther listens, designs, delivers, integrates and bears 100 percent final responsibility for its projects, from manual to mechanized.

Additional info

USP's: Fully Automated - No people needed
Efficient - processing up to 450-500 cartons per hour
Cost effective - payback time of one year Reliable -
always the right document on the right carton
Quick Win - short implementation
